Education and upbringing

upbringing - *helping someone grow up to be an accepted member of the community.*

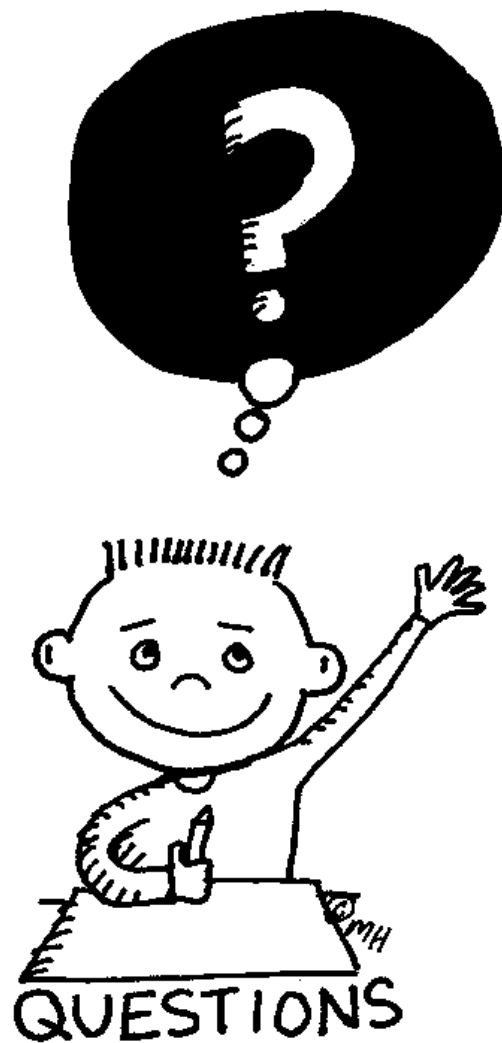

It is accepted, that:

- upbringing is given during the formative years of the child;
- the characteristics of the upbringing are strongly related to the type of society.

A question to consider:

*Do we care about upbringing
in the digital age?*

Information ecology

**A very effective
upbringing in the
information ecology**

The social status of the teachers

The role of teachers

The educational role may be taken partly by the IT, but **not** the upbringing

What has to be done?

- The democratic society has to define clearly its principles for the upbringing of children.
- A drastic change of the social status of the teachers is needed.
