# Preamble

“However difficult, governments must protect education budgets and invest in what makes education work - creating stimulating learning environments, providing incentives for quality teaching, reaching out to the vulnerable and adapting curricula and pedagogies to a fast-changing world. The better the learning outcomes, the more attractive education becomes.”

*Address by Irina Bokova, Director General of UNESCO, to the  
Education World Forum, 11 January 2011, London*

# UNESCO

## Its Five Functions

- Laboratory of ideas
- Standard-setter
- Clearing house
- Capacity builder
- Catalyst for international co-operation

United Nations  
Educational, Scientific and  
Cultural Organization

# How Does UNESCO Work?

- Analysis of trends, challenges, needs and results through coordination and partnership
- Implementation of activities in cooperation with national authorities at policy- and decision-making level, intergovernmental organizations, non-governmental organizations, the private sector
- ICT in education:
  - **IGOs:** OECD, The World Bank, The European Commission, The Commonwealth of Learning, International Telecommunications Union
  - **NGOs:** International Federation for Information Processing (IFIP); Society for Information Technology and Teacher Education (SITE); European Association of Distance Teaching Universities (EADTU); European Distance and E-learning Network (EDEN); International Council for Open and Distance Learning (ICDE); etc.

## Education Ministers' Round Table 2009

UNESCO/M. Ravassard Opening of the Education Ministers' Round Table

### Round-up of the Education Ministers' Round Table

What should education look like in 20 years time and what needs to change to get there? That question formed the basis of a two-day round table "What Education for the Future? - Lessons from the Major International Education conferences" held on October 9 and 10 as part of UNESCO's General Conference (October 6 to 23).

### Highlights

- Session 1: Improving skills: a qualitative leap for education
- Session 2: Teachers' vital role in inclusive education

### Ministers' Statements

- ▶ Statements
- ▶ Country contributions

### Resources

- ▶ Documents
- ▶ Highlights
- ▶ Keynote speeches

# The World Bank Teacher Policies Around the World (TPAW): 8 core teacher policy goals

- Setting clear expectations for teachers
- Attracting the best into teaching
- Preparing teachers with useful training and experience
- Matching teachers' skills with students' needs
- Leading teachers with strong principals
- Monitoring teaching and learning
- Supporting teachers to improve instruction
- Motivating teachers to perform

TALIS 2013

United Nations  
Educational, Scientific and  
Cultural Organization

# Teachers Move Up on the Policy Agenda: TALIS 2008 and 2013

- How well are teachers prepared today to face the diverse challenges in schools?
- How efficiently do appraisal and feedback incite good teaching and support teachers' development needs?
- How can policy makers ensure that resources invested in teachers' professional development will have a positive impact on teachers' work?

United Nations  
Educational, Scientific and  
Cultural Organization

# COL: Harnessing ODL to Recruit and Train Millions of Teachers

- Teacher education and ODL - two domains of research and practice crucial to national development and global sustainability in the early 21<sup>st</sup> century and beyond
- Exemplars of innovative technologies and equally innovative applications of those technologies in teacher education in developing and developed countries are provided

United Nations  
Educational, Scientific and  
Cultural Organization

# US: Transforming Education with ICT

- Recommendations in five key areas:
  - Learning
  - Assessment
  - Teaching
  - Infrastructure
  - Productivity

United Nations  
Educational, Scientific and  
Cultural Organization

# The ICT Revolution

A revolution which has triggered:

- a redefinition of the **roles for academics** (such as coaches, mentors, partners rather than content experts only)
- a new business model for universities faced with competitive forces (e.g. partnerships with other content providers - publishers and media companies - in the textbook market)
- the convergence of various communication devices at an affordable cost (m-learning)
- openness, sharing, participation and collaboration at an unprecedented scale (open source, open content, open educational resources)

# Towards Knowledge Societies (KN)

United Nations  
Educational, Scientific and  
Cultural Organization

UNESCO World Report, 2005:

- ✓ Offers an **intellectual, strategic and ethical vision on KS**
- ✓ **Education and access to knowledge**
- ✓ **Quality education for all**
- ✓ **Knowledge sharing** as a development imperative
- ✓ Innovative approaches to **e-learning**

# 2009 World Conference on Higher Education: What Role for ICT?

- A few **key messages** in this regard:
  - Member States should support the fuller integration of ICTs to meet increasing demands for **quality higher education in a lifelong learning perspective**
  - the application of ICT to teaching and learning has great potential **to increase access, quality and success**
  - the accelerated velocity of technology change has created pressing challenges that higher education, governments and industry must address together
  - **increasing attention to teacher training**: empowering teachers (“digital immigrants”) to harness the potential of ICT to provide learners with the knowledge and skills they need in the 21<sup>st</sup> century
  - in spite of the progress made, ICT are still unfairly distributed worldwide - need for more international solidarity to close the digital and knowledge divides

United Nations  
Educational, Scientific and  
Cultural Organization

# Will ICTs Make the Traditional University Obsolete?

- The conventional system alone cannot meet the challenges. We must ask the questions:
  - Will present-day universities become the dinosaurs of tomorrow?
  - Will there be profound changes in learning content?
  - What is the role of students and staff?
  - How will we ensure quality and sustainability on the Internet?
- Several innovations, such as open educational resources, mobile devices, social software and virtual mobility will radically change the landscape of global learning and expand the global learning community.

United Nations  
Educational, Scientific and  
Cultural Organization

# UNESCO ICT Competency Framework for Teachers (developed in partnership with Intel, Microsoft, Cisco, ISTE, Virginia Tech)

- Strong global need to impart ICT skills to teachers
- No universally recognized certification for ICT skills for teachers and no framework to update teacher training programmes
- To enhance teachers' professional development so as to advance their skills in pedagogy, collaboration and school innovation using ICT
- Three booklets: policy framework; competency standards modules; implementation guidelines (translated into over 12 languages)

United Nations Educational, Scientific and Cultural Organization

# 2009 Education Leaders Forum: "Universities Must Change!" (organized by UNESCO and Microsoft)

## CLOSING

# Open and Distance Learning: A Viable Alternative to Conventional Education

- ODL - a major strategy for **expanding access, raising quality and ensuring cost-effectiveness**
- For **governments** –
  - the main potential is to increase the capacity and cost-effectiveness of education and training systems
  - to reach target groups with limited access to conventional education and training
  - to support and enhance the quality and relevance of existing educational structures

United Nations  
Educational, Scientific and  
Cultural Organization

# ODL: A Viable Alternative (cont'd)

- For the **student/learner** -
  - ODL means increased access and flexibility as well as the combination of work and education
  - also a more learner-centred approach, enrichment, higher quality and new ways of interaction
  
- For **employers** -
  - ODL offers high quality and usually cost-effective professional development in the workplace
  - allows upgrading of skills, increased productivity and development of a new learning culture (in addition, it means sharing of costs, of training time, and increased portability of training)

United Nations  
Educational, Scientific and  
Cultural Organization

# A Framework for Successful Implementation of ICT Use in Teacher Education

- Seven chapters which provide resources to make policy makers better apply ICT to teacher education programmes
- Implementing successful integration of ICT in teacher education – key to fundamental wide-ranging reform

# UNITWIN / UNESCO Chairs Programme

## I. Definition and Background

- UNITWIN is the abbreviation for the University Twinning and Networking.
- The UNITWIN/UNESCO Chairs Programme, established in 1992, is conceived as a way to advance research, training and programme development in higher education by building university networks and encouraging inter-university cooperation through transfer of knowledge across borders.

United Nations  
Educational, Scientific and  
Cultural Organization

# Disciplinary and Geographic Breakdown

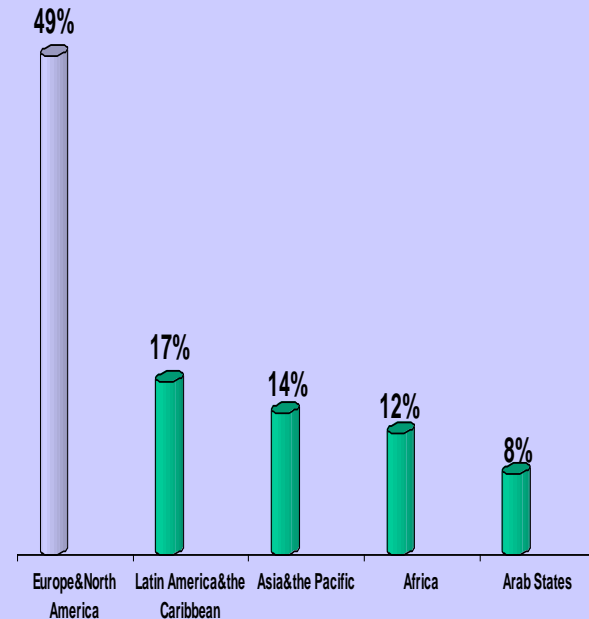

## II. UNITWIN in figures (as of 21.04.2010)

659 UNESCO Chairs

65 UNITWIN Networks

770 Higher Education Institutions

127 Member States
